

Maulana Azad National Institute of Technology, Bhopal

Department of Electrical Engineering

Class: B.Tech III Sem.

Sub: EMF& Materials (E-211)

Session- July-Nov. 2024

Assignments-5

Q. No.	Question
1	Discuss the properties and applications of any five commonly used conductor materials.
2.	Discuss the properties and applications of important resistor materials
3.	Explain the superconductivity and its applications. What is transition temperature?
4.	Explain the thermal classification of insulating materials and discuss their application in electrical machines.
5.	Discuss the properties and applications of mineral oils.
6.	Discuss the dielectric loss and dielectric constant?
7.	Explain how materials are classified as diamagnetic, paramagnetic, ferromagnetic and anti-ferromagnetic.
8.	Discuss the properties and applications of soft and hard magnetic materials.
